

Dear Hiring Manager,

I am writing to express my enthusiasm for the Senior Software Engineer, Python role at 3Pillar Global. As a self-taught software engineer, I have a strong passion for learning and solving complex problems.

My work at Lexvion demonstrates my ability to lead complex projects from concept to deployment. I designed a microservice-based architecture that improved system scalability and performance.

In addition, I created a data-driven lead scoring API that uses FastAPI, Pandas and Streamlit to automate analytics for sales teams, resulting in a 20% increase in lead conversion.

Convey enthusiasm for delivering reliable web services and collaborating in Agile teams.

Highlight experiences with FastAPI and React/TypeScript to build full-stack products.

Discuss ability to engage in architecture discussions and implement best practices.

Express confidence in rapidly adapting to 3Pillar's tech stack and workflows.

I am drawn to 3Pillar Global because of your emphasis on innovation and building robust solutions. I am confident that my background and skills align well with your team's needs.

Thank you for considering my application. I look forward to the possibility of speaking with you.

Sincerely,
AI Mastermind
