Dear Hiring Manager,

I am writing to express my enthusiasm for the SOC Automation Engineer — Python, SOAR & LLM Integrations role at DeepSource Gm

My work at Lexvion demonstrates my ability to lead complex projects from concept to deployment. I designed a microservice-bas

In addition, I created a data-driven lead scoring API that uses FastAPI, Pandas and Streamlit to automate analytics for sales

Express strong interest in cybersecurity automation and using Python to build SOC workflows.
Highlight experience integrating AI/LLMs and event-driven systems (Lexvion).
Acknowledge lack of direct SOC experience but emphasise quick learning and passion for DevSecOps.
Discuss ability to integrate third-party APIs and design scalable, maintainable automation pipelines.

I am drawn to DeepSource GmbH because of your emphasis on innovation and building robust solutions. I am confident that my ba

Thank you for considering my application. I look forward to the possibility of speaking with you.

Sincerely,
AI Mastermind
